

Project Design Phase-II Technology Stack (Architecture & Stack)

Date	25 February 2026
Team ID	LTVIP2026TMIDS73330
Project Name	Explore With Ai: Custom Itineraries For Your Next Journey
Maximum Marks	4 Marks

Technical Architecture:

The Deliverable shall include the architectural diagram as below and the information as per the table1 & table 2

Reference: <https://developer.ibm.com/patterns/ai-powered-backend-system-for-order-processing-during-pandemics/>

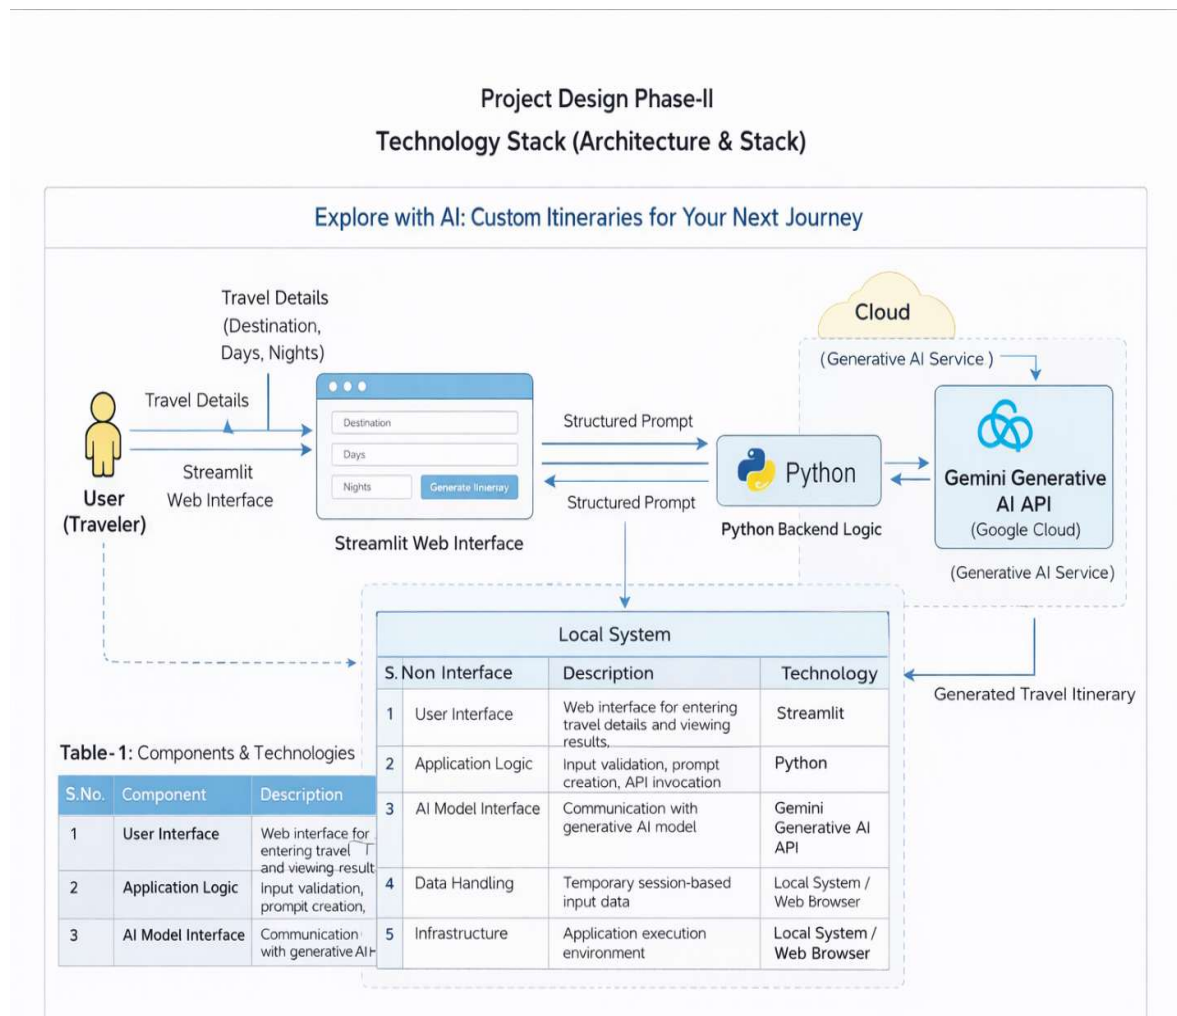

Table-1 : Components & Technologies:

S.No	Component	Description	Technology
1	User Interface	Web interface for entering travel details and viewing results	Streamlit
2	Application Logic	Input validation, prompt creation, API invocation	Python
3	AI Model Interface	Communication with generative AI model	Google Generative AI API (Gemini)
4	Data Handling	Temporary session-based input data	Streamlit session handling
5	External API	Generative AI service for itinerary creation	Gemini Flash Model
6	Infrastructure	Application execution environment	Local System / Web Browser

Table-2: Application Characteristics:

S.No	Characteristic	Description	Technology
1	Open-Source Frameworks	Used for UI and backend development	Python, Streamlit
2	Security Implementations	API key protection and input validation	Secure API configuration, Input Validation
3	Scalable Architecture	Easily extendable to include new features	Modular Python Architecture
4	Availability	Accessible when application server is running	Streamlit Server
5	Performance	Real-time AI response generation	Optimized API call handling
